The screenshot shows the Twilio SendGrid dashboard interface. On the left is a sidebar with navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The main content area has a header with the user's name 'Gokul Kavin S.' and a 'Welcome, Gokul!' message. Below this is a section titled 'Send your first emails with Twilio SendGrid' with an illustration of two people running. The primary task is 'Create a sender identity', which includes a sub-header 'Create a sender identity' and a paragraph explaining the need for a sender identity. There are two buttons: 'Create a Single Sender' and 'Authenticate a domain instead'. To the right, a diagram shows an email from 'Your Business' to a recipient's inbox. Below this is a 'Send your first email' section with a note to create a sender identity first. At the bottom, there's a 'Remove email sending limits' section and a 'Finish your account setup' progress indicator showing '0 out of 4 completed'.

Gokul Kavin S.

Welcome, Gokul!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are two ways to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business - name@your-business.com

Send

Send your first email

Please create a sender identity before sending your first email.

Remove email sending limits

Finish your account setup
